Quassel IRC - Feature #421

Have a "On attach" and "On detach" perform list

Description

So rather than just having an away-on-detach option, it would be nice if we had some sort of perform list as well (/instead).

That way, you can leave channels on detach and rejoin them on attaching, say some annoying away message, do op stuff, ...
I'm sure people will come up with a lot more interesting uses that I haven't even dreamt of ;)

away-on-detach would be subset of that new functionality. And it should not be extremely hard now that away-on-detach already works.
