Quassel IRC - Bug #939

After waking up from suspend, the Connect button is grey, even when Quassel is not connected

Version:	0.5.0	**OS:**	Any

Description

After waking up from "suspend mode" Quassel is disconnected from the core.
To reconnect I've got to use the menue (File->Connect to tocre/Datei->Zum Core verbinden) instead of the nice Connect button Quassel provides.

I've got the problem using quassel-0.5.0 on Ubuntu after using pm-suspend, and one of our users got the same problem using 0.5.0 on Windows XP, using the sleepmode of the operating System on her laptop.

I checked the ticket system for similar bugs, but I couldn't think of good search terms for searching the issue, so I'm not really sure if there is already a bug open.

Thanks, and keep up the good work.

Regards,
Verschdl
