Quassel IRC - Bug #95

Implement periodic /WHO

02/11/2008 03:35 PM - Sputnick

Status:	Closed	**Start date:**	
Priority:	High	**Due date:**	
Assignee:	Sputnick	**% Done:**	100%
Category:	Quassel GUI (Qt)	**Estimated time:**	1.00 hour
Target version:	0.5.0		
Version:	0.3.1+	**OS:**	Any

Description

In order to update the away status of irc users, we have to send /WHO periodically (say, every 60 seconds). This should be handled from within NetworkConnection. Also replys should not be displayed (->IrcServerHandler needs to differentiate between auto-WHO and manual WHO).

History

#1 - 02/20/2008 09:12 PM - Sputnick

Has been partially implemented - i.e. periodic WHO is sent every 60 seconds now, but this is not configurable yet. Also, RPL_WHO and ENDOFWHO have been silenced for the time being.

#2 - 04/09/2008 03:40 PM - Sputnick

This has been implemented core-side. We lack a way to configure this via GUI, but that might be added later. For now, it checks all channels every 90 seconds, with a 3-second delay between each channel.

#3 - 01/24/2009 12:03 AM - sph

It would be great if that 90 seconds delay was configurable in the settings :)

#4 - 01/24/2009 12:04 AM - Sputnick

- Category changed from Quassel Core to Quassel GUI (Qt)

- Status changed from Closed to Feedback

- Target version deleted (0.2.0-alpha5)

- Estimated time set to 1.00 h

#5 - 11/02/2009 09:26 PM - dalbers

- Status changed from Feedback to Closed

- Target version set to 0.5.0

- % Done changed from 0 to 100

- OS set to Any
