Quassel IRC - Bug #982

chat list focussing wrong element

06/01/2010 01:45 PM - pennywise

Status:	New	**Start date:**	06/01/2010
Priority:	Normal	**Due date:**

Target version:			
Version:	0.6-pre	**OS:**	Any

Description

I have a custom chat list with "unread" channels (minimum activity: 'new message'). When there is new stuff in more than a channel in one network (like the famous moepnet), than if I click on one chatroom, the chatroom is correctly presented, but the focus of the tree-element is off by one. Like this:

moepnet:
#something
#news
#paniks

clicking on #news

moepnet:
#something
#news
[#paniks]

so #news is shown, but "#paniks" is highlighted in the list. Version is actually 0.7-pre+93 (http://git.quassel-irc.org/?p=quassel.git;a=commit;h=e223b940bbb059f9fb56db1aa70cd72bcabf1d0b)
