#### Description

If quassel client is maximized (only tested with it not on top) it will stop logout the first time it's tried (see screenshot). If it's minimized or on subsequent attempts it doesn't stop logout. I can't see why quasselclient should ever do this.

Package is Kubuntu git snapshot from January 13 with KDE integration on running on Kubuntu 8.10 with KDE 4.1.3.

#### History

Happens with 4.1.4. too.

##### #2 - 01/20/2009 04:37 PM - Sputnik

- Status changed from New to Resolved

- Assignee set to EgS

- Target version set to 0.4.0

That commit fixes the issue indeed.
