| if i select from the menu view->buffer views->configure buffer view, the options window is not wide enough, so a scrollbar in the right "preview" pane appears. the width when its embedded in the normal configuration window is enough. |                   |                        |            |
