

Quassel IRC - Bug #895

Weird K-Line behavior

01/18/2010 07:57 AM - Anonymous

Status:	Rejected	Start date:	01/18/2010
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Quassel Client	Estimated time:	0.00 hour
Target version:		OS:	Windows
Version:	0.6-pre		
Description			
<p>I was idling in #ubuntu on Freenode today when some users in the channel got K-Lined.</p> <p>Strangely my client created a chat buffer for each of the K-Lined Users with the following:</p> <pre>[14:09:33] <-- dby (n=cylifgin@bas1-montreal47-1096742003.dsl.bell.ca) has quit (K-lined) [14:09:33] * No such nick/channel dby [14:09:33] * No such nick/channel dby [14:09:34] * No such nick/channel dby</pre> <p>I also received "no such nick/channel" notifications in the system tray</p> <p>Running core on Ubuntu Linux, and client on Windows 7.</p> <p>Client: Version: v0.6-pre (0.5.0+134 git-f8dcbdf) Core: Quassel IRC: v0.6-pre (0.5.0+91 git-a8c38cb)</p>

- Status changed from New to Rejected

I don't think it's an issue with the k-line-handling. (mostly because there is none ;)) From an observer point of view (neither the kliner nor the klinee) the kline is absolutely indifferent to a regular quit.

It wouldn't surprise me if Mr. dby was k-lined due to spamming. And most likely you will find some ctcp-requests from him in your statusbuffer. Those requests were probably not yet answered when dby was k-lined, so quassel was merely reacting to the queued ctcp-requests. since at this time dby was no longer on the network you were seeing those "No such nick/channel" messages, which are usually displayed in the current channel.

In addition: a k-line on a testnetwork did not result in the same output.
