Quassel IRC - Bug #1032

Quassel client cannot unset both identity SSL key and certificate

10/20/2010 02:59 PM - kode54

Status:	Resolved		**Start date:**	10/20/2010
Priority:	Normal		**Due date:**

Target version:	0.9.0			
Version:	0.7-pre		**OS:**	Any

Description

Currently, the client supports setting both a SSL key and certificate with each identity. Unfortunately, it is impossible to remove both of them.

Opening the configuration dialog for identities, under the Advanced tab, presents Clear buttons for both key and certificate if both are set. Clicking the Clear button for either activates the Apply button for the Configuration dialog, while clicking both of them disables it again. Closing the dialog after clicking both of them has the effect of doing nothing. Clearing only one and closing the dialog clears the one, but then reopening and attempting to clear the other does nothing.

Revision 1290b01b - 02/20/2013 12:10 AM - Bas Pape

Set key and cert for the temp identity manually

Normally these are synced, but in this case they need to be set manually
for hasChanged to work.
