

Quassel IRC - Bug #1114

Can't send messages unless you click input bar /again/

10/25/2011 08:18 AM - mattwb65

Status:	Resolved	Start date:	10/25/2011
Priority:	Urgent	Due date:	
Assignee:		% Done:	0%
Category:	Quassel Client	Estimated time:	0.00 hour
Target version:		OS:	Mac OS X
Version:	0.7.2		
Description			
If you type into input bar, and try to click enter it doesn't send unless you click into the input bar again, and click enter.			

History

#1 - 03/18/2012 12:34 AM - Anonymous

- Subject changed from OS X: Can't send messages unless you click input bar /again/ to Can't send messages unless you click input bar /again/
- Status changed from New to Feedback
- OS changed from Any to Mac OS X

Please try a newer build (for instance: http://koudelka.dyndns.org/quassel/QuasselClient_MacOSX_Universal_0.8-rc1.dmg) and confirm or refute whether this is still the case. The input bar is known to have lost focus due to tab completion (see [#1043](#)), but this might be a different issue.

#2 - 02/20/2013 08:04 PM - Anonymous

- Status changed from Feedback to Resolved
