

Quassel IRC - Bug #112

Channeltooltip looks like garbage

02/20/2008 09:48 PM - EgS

Status:	Closed	Start date:	
Priority:	High	Due date:	
Assignee:	phon	% Done:	0%
Category:	Quassel GUI (Qt)	Estimated time:	0.00 hour
Target version:		OS:	Any
Version:	0.13.1		
Description			
If the topic is more than about 20 characters the whole thing gets wrapped (often multiple times) rendering the Tooltip to something like Toolgarbage			

History

#1 - 02/20/2008 11:00 PM - phon

I noticed the automatic linebreak of the topic. In the channels I was joined at that moment (e.g. #quassel.de) it didn't look that bad. Perhaps an extra linefeed, some other colors or a horizontal rule might help.

#2 - 02/20/2008 11:10 PM - EgS

I attached 2 files that show the issue.

In general I think (open to discussion) that the tooltips should contain important/helpful data represented in a clean way. think: less is more. So: is the topic needed or helpful here? Maybe a short/elided version suffices?

#3 - 02/20/2008 11:15 PM - EgS

looking at those screenshots: less than and greater than (</>) should be escaped, as they are treated as tags and unknown tags are dropped.

#4 - 02/21/2008 01:04 AM - phon

what about this:

i changed the order - topic is now last

i placed a small blank line as spacer between the topic and the rest - the horizontal rule had too much height (even after setting <hr style="height: 2px"/>)

-> see screenshots #gentoo & #qt-chat

#5 - 02/22/2008 02:53 PM - phon

... any ideas/remarks concerning my screenshots?

as EgS said: less is more - so the topic could also be chopped or even not displayed at all. perhaps the user should decide for himself (configuration -> general-options)

#6 - 02/27/2008 03:59 PM - phon

context menu is now configurable - it can be chosen if the topic is shown in the context menu
