

## Quassel IRC - Bug #1153

### KDE fullscreen doesn't work for Quassel IRC

04/17/2012 03:07 PM - lilian.moraru

<b>Status:</b>	Resolved	<b>Start date:</b>	04/17/2012
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	100%
<b>Category:</b>	Quassel GUI (KDE)	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>OS:</b>	Linux
<b>Version:</b>	0.7.3		
<b>Description</b>			
<p>Quassel IRC in my case) comes by default with Kubuntu. I tried the fullscreen option that KDE has since KDE 3 and it crashes the application. It doesn't open a crash window with the option to report it but it does make the app unresponsive for about 10 seconds and then it closes. I tried it in Kubuntu 11.10 with KDE 4.8.1 and 4.8.2. Steps to reproduce: - Open Quassel IRC in KDE - Press Alt + F3 and go to "Advanced" -&gt; "Fullscreen".</p> <p>It is really interesting because the KDE Fullscreen option works for any application, be it GTK or Qt/KDE based.</p>			

#### Associated revisions

##### Revision 47a6910a - 12/23/2013 12:55 AM - Manuel Nickschas

Fix fullscreen mode

In some setups, the FullScreen action would get out of sync with the actual window state and thus kick Quassel into an endless loop and finally a crash when toggling full screen mode.

Turns out reading the docs for KToggleFullScreenAction helped doing this properly (avoiding this and other bugs when using QWidget's methods).

Thanks to yofel and hays for reporting, and apachelogger for putting me on the right track for fixing this.

Fixes #1153, fixes #1258.
