

Quassel IRC - Bug #1258

Screen Corruption w/ FullScreen in i3 WM

12/22/2013 08:26 PM - wintermute_77@yahoo.com

Status:	Resolved	Start date:	12/22/2013
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:	Quassel Client	Estimated time:	0.00 hour
Target version:		OS:	Linux
Version:	0.9-pre		
Description			
I am using quasselclient on Archlinux and am running the i3 windowmanager (WM). This WM has a feature to fullscreen an application which I have bound to Mod4+F. When I invoke fullscreen, I get screen corruption and WM unresponsiveness for a few seconds before Quasselclient crashes. Attached is backtrace. I am running quasselclient 0.9.1.			

Associated revisions

Revision 47a6910a - 12/23/2013 12:55 AM - Manuel Nickschas

Fix fullscreen mode

In some setups, the FullScreen action would get out of sync with the actual window state and thus kick Quassel into an endless loop and finally a crash when toggling full screen mode.

Turns out reading the docs for KToggleFullScreenAction helped doing this properly (avoiding this and other bugs when using QWidget's methods).

Thanks to yofel and hays for reporting, and apachelogger for putting me on the right track for fixing this.

Fixes #1153, fixes #1258.
