Version:	0.10.0		
Description			
Quassel should automatically re-connect to the core when the network is back up.			
Steps to reproduce:			
<ul style="list-style-type: none">• Connect to the core• Plug out the LAN cable. Quassel disconnects.• Plug the LAN cable back in, wait till Network-Manager does DHCP etc.			
Actual behaviour:			
<ul style="list-style-type: none">• Quassel does nothing			
Expected behaviour:			
<ul style="list-style-type: none">• Quassel should notice the network is back up (NM announces with via d-bus, I assume solid forwards that) and re-connect
