

## Quassel IRC - Bug #1302

### Quassel replies to any form of CTCP request - even seemingly invalid ones.

08/01/2014 12:48 AM - Zarthus

<b>Status:</b>	New	<b>Start date:</b>	08/01/2014

<b>Target version:</b>		<b>OS:</b>	Any
<b>Version:</b>	0.10.0		
<b>Description</b>			
<p>Whenever any form of text contains \x01VERSION\x01 Quassel will reply.</p> <p>(00:37:16) &lt;@Zarthus&gt; random garbage 'VERSION' more garbage (00:37:17) [someone VERSION reply]: Quassel IRC v0.10-rc1 (git-74f0f8a) (built on Apr 29 2014 23:31:28) -- <a href="http://www.quassel-irc.org">http://www.quassel-irc.org</a> (00:37:17) [someone2 VERSION reply]: Quassel IRC v0.11-pre (0.11-pre+83 git-f6cc3c4) (built on Apr 19 2014 11:09:37) -- <a href="http://www.quassel-irc.org">http://www.quassel-irc.org</a></p> <p>This mostly affects modes that disallow the sending of CTCP requests to the channel, and thus can be abused. However it doesn't pose a large threat, and therefore seems to be of trivial quality.</p> <p>To reproduce, send any string containing \x01VERSION\x01 to any channel (obviously, this is ill advised to do this in large channels).</p> <p>I'm not sure which versions this affects as I don't use Quassel, but the above two version replies were kept in to give an indication that it still seems to appear in recent versions.</p>
