

Quassel IRC - Bug #1340

Quasselcore crashes when connecting

02/20/2015 07:58 PM - laiti

Status:	New	Start date:	02/20/2015
Priority:	Urgent	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		OS:	Linux
Version:	0.11-pre		
Description			
<p>Quassel core crashes when connecting. This happens every time and with Quasseldroid and OS X client. Quasseldroid says: "IO Error while connecting! null" and OS X Client "The remote host closed the connection". This has happened for me for a long time on that machine, also with previous versions. Most likely this has been around since version 0.9.2 since I found sources of that in my src directory.</p> <p>Quasselcore was the latest version from git and compiled with following commands:</p> <pre>rm -r build mkdir build cd build cmake .. -DCMAKE_INSTALL_PREFIX=/home/users/laiti/.local/quassel -DCMAKE_BUILD_TYPE=Debug -DWANT_CORE=ON -DWANT_QTCLIENT=OFF -DWANT_MONO=OFF make make install</pre> <p>[laiti@drail ~/.local/quassel]\$ bin/quasselcore -v Quassel IRC: v0.12-beta1 (git-05b9069)</p> <p>[laiti@drail ~/.local/quassel]\$ bin/quasselcore -p 40031 -l ~/quassel.debug.log -L Debug -d ("SQLITE", "QMYSQL3", "QMYSQL") <at this phase I connect to core, it crashes and returns to shell> [laiti@drail ~/.local/quassel]\$ echo \$? 1</p> <p>[laiti@drail ~]\$ uname -a Linux drail 3.2.65-grbfs-kapsi #2 SMP Thu Dec 18 22:25:24 EET 2014 x86_64 GNU/Linux</p> <p>[laiti@drail ~/src/quassel-git]\$ g++ --version g++ (Debian 4.7.2-5) 4.7.2</p> <p>[laiti@drail ~/src/quassel-git]\$ cmake --version cmake version 2.8.9</p> <p>~/quassel.debug.log and ~/.config/quassel-irc.org/Quassel-Crash-20150220-2043.log are as attachments.</p>			

History

#1 - 07/24/2015 01:11 PM - laiti

Reproducible with 0.12.2. I tried also quasselcore-static-0.12.2, it crashes immediately upon start - I do not even get to connect.
