<b>Description</b>			
<p>It regains focus when I start typing, but in the (somewhat common) case where I hit tab and then hit backspace to remove the username again, this hides the channel as if I had been in the channel list.</p>			
Reproduce:			
<ul style="list-style-type: none"><li>- Go into IRC channel</li><li>- Type the first letters of a nickname</li><li>- Hit tab to complete</li><li>- Hit backspace</li></ul>
