

## Quassel IRC - Bug #1410

### Wrong part of chat list is hidden on disconnect

05/30/2016 03:18 PM - wink

<b>Status:</b>	New	<b>Start date:</b>	05/30/2016
<b>Priority:</b>	Normal	<b>Due date:</b>

<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>OS:</b>	Linux
<b>Version:</b>	0.12.4		
<b>Description</b>			
<p>I have 2 custom chat lists called Channels and Queries - they unsurprisingly have all Channels and all Queries respectively.</p> <p>I have a core and am connected to 7 networks. (One of them is irc.mozilla.org which is often flaky.) So when I rightclick -&gt; disconnect on one network, the queries for a different network are hidden. Disconnecting from core and reconnecting fixes this.</p> <p>The version is actually today's master (0.13-pre) but I've had this issue since at least 0.12.3 (One reason why I upgraded today)</p> <p>my build flags:</p> <pre>LINGUAS="en_US" cmake .. -DWANT_CORE=OFF -DWANT_MONO=OFF -DWITH_KDE=OFF -DWITH_WEBKIT=ON -DEMBED_DATA=ON</pre> <p>cmake output:</p> <pre>-- Using CMake 3.5.2 -- Building for Qt4... -- Found execinfo (built-in) -- Embedding data files into the binary -- Embedding bundled Oxygen icons -- Including languages: en -- -- The following features have been enabled:</pre> <ul style="list-style-type: none"><li>• WANT_QTCLIENT , Build the client-only binary (requires a core to connect to)</li><li>• WITH_OXYGEN , Install Oxygen icon set</li><li>• EMBED_DATA , Embed icons and translations in the binaries instead of installing them</li><li>• QtDBus module , Needed for supporting D-Bus-based notifications and tray icon, used by most modern desktop environments</li><li>• SSL support in Qt , Use secure network connections</li><li>• syslog.h , Provide support for logging to the syslog</li><li>• Qt Linguist Tools , Translation support for Quassel</li></ul> <pre>-- The following OPTIONAL packages have been found:</pre> <ul style="list-style-type: none"><li>• PkgConfig</li><li>• ExecInfo , a library for inspecting backtraces Used for generating backtraces in case of a crash</li><li>• Git</li></ul> <pre>-- The following RECOMMENDED packages have been found:</pre> <ul style="list-style-type: none"><li>• ZLIB , a popular compression library , &lt;<a href="http://www.zlib.net">http://www.zlib.net</a>&gt; Use the most common library for protocol compression, instead of the bundled miniz implementation</li></ul> <pre>-- The following REQUIRED packages have been found:</pre> <ul style="list-style-type: none"><li>• Qt4 (required version &gt;= 4.8.0)</li></ul> <pre>-- The following features have been disabled:</pre> <ul style="list-style-type: none"><li>• WANT_CORE , Build the core (server) binary</li><li>• WANT_MONO , Build the monolithic (all-in-one) binary</li></ul>			

- WITH\_KDE , Enable KDE4 integration
- WITH\_WEBKIT and QtWebKit module , Support showing previews for URLs in chat

-- The following OPTIONAL packages have not been found:

- Libsnore , a cross-platform notification framework , <<https://github.com/TheOneRing/Snorenotify>>  
Enable support for the snorenotify framework
- IndicateQt , a library to raise flags on DBus for other components of the desktop to pick up and visualize , <<https://launchpad.net/libindicate-qt/>>  
Provides integration into the Ayatana notification system used by e.g. Ubuntu

-- The following RECOMMENDED packages have not been found:

- dbusmenu-qt , a library implementing the DBusMenu specification , <<https://launchpad.net/libdbusmenu-qt>>  
Required for having a context menu for the D-Bus-based tray icon
- Phonon , a multimedia abstraction library , <<https://projects.kde.org/projects/kdesupport/phonon>>  
Required for audio notifications
