Target version:		OS:	Any
Version:	0.12.4		
Description			
Not sure if this is the right place to post this, but I don't know where else would be ;)			
When accessing http://bugs.quassel-irc.org/projects/quassel-irc/issues.atom which is linked from http://bugs.quassel-irc.org/projects/quassel-irc/issues (or any Atom feed for an issue), I get a 500 internal server error from Redmine.
