

Quassel IRC - Bug #1538

multiple (semicolon separated) senders do not work for remote highlights

10/18/2019 12:19 PM - blackntan

Status:	Feedback	Start date:	10/18/2019
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Quassel Core	Estimated time:	0.00 hour
Target version:	Some future release	OS:	Any
Version:	0.13.0		

Description

remote highlight issue -> I added a semicolon separated list of senders to a remote highlight and now it's not being triggered at all
this doesn't work at all (no highlighting for either nick) --> nickone!*;anothernick!*
if i remove the ;anothernick!* it starts working for the original nick
this works --> nickone!*

core version --> v0.13.1 (0.13.1+3 git-868af1b1)
client version --> <https://github.com/quassel/quassel/commit/3778a12912369eb5add886bb65ca74e9df841744>

- Status changed from New to Feedback

Further discussion on IRC revealed that Regex is enabled for this rule. The sender field also requires the use of regex then (why the single match worked with just '*' is beyond my knowledge). OP is testing with a correct regex syntax and will report back.

#2 - 10/21/2019 03:44 PM - blackntan

regex works perfectly fine ... maybe an opportunity to note this information in the mouse-over text ... as it doesn't mention regex at all there.
