Quassel IRC - Feature #1588

URL as an independent "Chat view color" option- currently unreadable on dark background

07/23/2020 06:20 PM - twl

Status:	New		**Start date:**	07/23/2020
Priority:	Normal		**Due date:**

OS:	Any			

Description

Please add a custom color option for any links posted (URL/URI). I always run green on black, as I like it best. With the dark blue URI appearance now, I can not pre-check a link without copying it somewhere else. I also think it would make the settings more consistent to be able to configure (mostly) everything.
I use 0.13.1 on Windows, if this makes a difference. Thanks for all the work on Quassel and hopefully picking this up.

Is there a way to stop spam vandals, or at least delete the spam edits later?

#2 - 08/07/2020 08:13 PM - digitalcircuit

twl: Sorry about the spam. Though I don't have any way of changing the apparently-lacking CAPTCHA implementation, I can try to delete the comments as I see them. I'll put the bug tracker activity feed into my RSS reader to make it easier to catch when it happens.

As per discussion in freenode/#quassel, we'll need someone with access to edit Redmine itself to set up a more robust, or unique-to-Quassel CAPTCHA. Perhaps a "What's the current release of Quassel? Format: X.XX (ignore minor version)" with a pointer to the website and the freenode channel to find out.
