Description
If I set a user mode, ie. +i I would like that mode saved and reapplied after a core restart.

History

#1 - 10/19/2008 10:35 PM - Sputnick

Wouldn't it be better to just set a /mode command in the perform list? Otherwise, we'd need to track manual mode changes and reapply them on connect. We can't just save the current mode string, since some of those modes are set by the server.

#2 - 11/15/2008 09:59 PM - Sputnick

Since no feedback came, I'll close this as WONTFIX. Keeping track of manual mode changes (as opposed to server-set ones) seems like a lot of effort for little gain, in particular since /mode works nicely in the perform list. Feel free to reopen this if you have convincing arguments though :)
