#### Description

<http://libsigsegv.sourceforge.net/> was recommended by Flameeyes

The documentation is a bit thin, but it seems to be worth a look, as it works with Linux, Mac OS X and Windows.

Some things that come to my mind:

- on Windows this Lib can only be build statically
- on Linux one should use the lib from the repo
- on Mac OS X we should ship the Lib with the bundle

#### History

##### #1 - 07/11/2008 04:02 PM - EgS

Sput: please have a look at this thingy when you've got some spare time. **hehe**  
This BR is mainly a reminder though ;)

##### #2 - 09/28/2008 11:58 PM - Sputnik

Fixed for Linux, not needed on Mac, no solution in sight for Windows. Might want to revisit that one once we get a Windows developer. If we ever get one, that is...
