<b>Description</b>			
After editing the topic (click edit-button, click chatview to stop editing), the topic-widget gets fubar. With oxygen-style ( <a href="http://pub.antistof.dk/quassel-oops-2.png">http://pub.antistof.dk/quassel-oops-2.png</a> ), with plastique it disappears totally.			
A client restart, and everything is normal.

A client-style switch also >seems< to make the topic-widget normal again.
