<b>Description</b> Please add a list of watched nicks or at least have the ability to get notified somehow when certain people join a network. Konversation has a tab for this that shows the people you monitor and which channels they are in. Irssi has /notify which shows a list of online/offline people and also gives you a message in the status window when someone (dis)connects.

### History

#### #1 - 08/18/2009 06:37 PM - Lingerance

- OS set to Any

It'd also be nice if quassel used this information to monitor PM buffers.
