<b>OS:</b>	Any		

#### Description

<jussi01> Sput: was just thinking about it, would it be difficult to put a number in brackets after a hilighted buffer to tell you how many times you had been hilighted? Use case is if you come back after a good amount of time and theres more than one hilight in scrollbar you often miss it..

<Sput> jussi01: nice idea, please use your shiny new redmine account for that :)

Also along these lines would be nice to have a printout of all hilights since last disconnect from core in the status buffer on reconnect. (irssi feature/script)
