<b>Version:</b>	0.3.1+	<b>OS:</b>	Any

**Description**

I have currently some issues with my network. Due to that, I have a log around 4-5 seconds between quasselclient (win) and quasselcore (linux).

When I write someone something in a query, minimize the client and "do some work", after 4-5 seconds (due to the lag I guess) the notify with my message pops up.

So my next guess is: A notify is shown if something happened while the window is minimized.

Better would be: A notify is shown if something new happened which DIDN'T originate from me, while the window is minimized. I'm using [e94adb7dab9f1dfcb9f792912a365e6c72728d82](https://www.quassel-irc.org/bugs/507) on Windows XP

Don't invoke notifications for own messages, fixes #507

##### Revision dc2aa39d - 02/11/2009 11:37 PM - Manuel Nickschas

Don't invoke notifications for own messages, fixes #507

#### History

##### #1 - 01/29/2009 01:51 PM - EgS

- Status changed from New to Feedback

If understood the issue correctly, then the title doesn't really fit. In general Quassel should never notify about messages that have the self-flag set. This flag indicates that you wrote that message.

In case that doesn't work for you the title should be imho rather be something like "quassel notifies about own messages".

##### #2 - 02/11/2009 01:20 AM - EgS

- Subject changed from *Tooltip comes a little "late"* to *Don't invoke notification backends for Messages with self flag set*

- Due date set to 02/16/2009

- Assignee set to *Sputnick*

- Target version set to 0.4.0

- OS set to *Any*

Sput: I'm assigning this to you, as you're the notification backend guy

##### #3 - 02/11/2009 09:37 AM - pennywise

I'm not sure what exactly triggers this event, maybe a highlighting rule is intervening as well. And yes, you're right, my title for this bug wasn't that clear.

##### #4 - 02/11/2009 11:48 PM - Sputnick

- Status changed from *Feedback* to *Resolved*

- % Done changed from 0 to 100
