<b>Target version:</b>	
<b>OS:</b> Any	
<b>Description</b> It would be nice to have an event-driven system. In Pidgin this is called Buddy-Alarm, that means that the user can set which action (e.g. show a popup or play some music) should be executed after a specific user is logged in (or when something else happened with this user).	
<b>Related issues:</b> Is duplicate of Quassel IRC - Feature #773: Friendlist <b>Confirmed</b> <b>08/20/2009</b>
