

Quassel IRC - Bug #693

Quassel doesn't respect the order of servers in a network in certain reconnect situations

05/12/2009 10:30 PM - lozzd

Status:	Resolved	Start date:	05/12/2009
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:	Quassel Core	Estimated time:	0.00 hour
Target version:		OS:	Any
Version:	0.4.1		
Description			
Sometimes Quassel won't connect to the first server, even when it could (and should)...			
<lozzd> the ordering of different servers for a network is not respected always			
<lozzd> heres a scenario			
<lozzd> theres one good irc server, and one backup, that works, but i don't like to use it so much			
<lozzd> on first connect ever, it will connect to the good one			
<lozzd> the good one fails, and it reconnects to the backup, fine			
<lozzd> but then, the first one comes up again, and i want to reconnect to that. so i disconnect, and reconnect, expecting it to use the first server again.. it doesn't, it uses the backup one again			
<lozzd> I have to delete the backup server from the settings, connect, and then re-add the backup server again

Revision cb53823e - 04/24/2017 11:02 PM - genius3000

core: connectToIrc: Pick first IRC server specified when not failed

When connecting to the IRC network, only clear the '_previousConnectionAttemptFailed' flag when trying the next server in the list. Otherwise, reset server index to start from the top.

Currently, Quassel will continue to use the last used (working) server (or a random server if set to). This doesn't match the intention of having an ordered list of servers to use. The change here just makes Quassel start with the first server in the list unless it's a failed attempt, in which it continues down the list (same as currently).

This fixes the issue of getting "stuck" on a specific server even if you manually disconnect and connect.
