<b>Category:</b>	Quassel Client	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	0.2.0-rc1		
<b>OS:</b>	Any		
<b>Description</b>			
it would be nice, if the tray icon would change its appearance to display some status information, e.g.:			
<b>current user status</b>			
*connected to all networks / just been disconnected from one network			
<b>*online / away</b>			
<b>*buffer information</b>			
*new highlighted chatlines			
**any other kind of activity			
display messages addressed to the user in a pop-up as often used by other applications.			
*mac os x: adium and many others use growl ( <a href="http://growl.info/applications.php">http://growl.info/applications.php</a> )			
*windows: bubble pop up from the tray icon			
*linux: should have something similar

This has been fixed a while ago already, though we might want to have different animations or something :)
