

## Quassel IRC - Bug #95

### Implement periodic /WHO

02/11/2008 03:35 PM - Sputnik

<b>Status:</b>	Closed	<b>Start date:</b>	
<b>Priority:</b>	High	<b>Due date:</b>	
<b>Assignee:</b>	Sputnick	<b>% Done:</b>	100%
<b>Category:</b>	Quassel GUI (Qt)	<b>Estimated time:</b>	1.00 hour
<b>Target version:</b>	0.5.0	<b>OS:</b>	Any
<b>Version:</b>	0.3.1+		
<b>Description</b>			
In order to update the away status of irc users, we have to send /WHO periodically (say, every 60 seconds). This should be handled from within NetworkConnection. Also replys should not be displayed (->IrcServerHandler needs to differentiate between auto-WHO and manual WHO).			

### History

#### #1 - 02/20/2008 09:12 PM - Sputnik

Has been partially implemented - i.e. periodic WHO is sent every 60 seconds now, but this is not configurable yet. Also, RPL\_WHO and ENDOFWHO have been silenced for the time being.

#### #2 - 04/09/2008 03:40 PM - Sputnik

This has been implemented core-side. We lack a way to configure this via GUI, but that might be added later. For now, it checks all channels every 90 seconds, with a 3-second delay between each channel.

#### #3 - 01/24/2009 12:03 AM - sph

It would be great if that 90 seconds delay was configurable in the settings :)

#### #4 - 01/24/2009 12:04 AM - Sputnik

- Category changed from Quassel Core to Quassel GUI (Qt)
- Status changed from Closed to Feedback
- Target version deleted (0.2.0-alpha5)
- Estimated time set to 1.00 h

#### #5 - 11/02/2009 09:26 PM - dalbers

- Status changed from Feedback to Closed
- Target version set to 0.5.0
- % Done changed from 0 to 100
- OS set to Any
