Quassel IRC - Bug #962

status window ability to send to server

Description

undernet detects that I am not sending identd so it then asks me to prove I am not a robot by requesting:

/QUOTE PASS 88074

as an example. but Quassel does not have the ability to type in the status window before the official you are here message has been received.

This effectively prevents me from logging into that network when identd is not available.
