

## Quassel IRC - Feature #989

### Add ignore highlight option in a channel's context menu

<b>Description</b> I don't want to get those notifications from highlights in certain channels. An option to ignore those (but still show them) would fit in nicely along with the "hide events" in the channel context menu.

- Status changed from New to Resolved
- Target version set to 0.13.0
- % Done changed from 0 to 100

This can be done in 0.13 (as of this comment, -rc1 is out) with remote highlights. There's a 'Highlight Ignore Rules' tab, which can be used for blank message (or ".\*" with regex) and set per channel, etc.
